

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

The following table outlines the foundational user challenges across different stakeholders interacting with the credit card evaluation ecosystem. By defining these emotional and operational roadblocks, we establish clear target requirements for our machine learning solution.

Example:

Customer Problem Statements (AI-ML Project)

	PS-1	PS-2	PS-3
I AM	 A Bank Credit Analyst	 A Prospective Credit Card Customer	 A Financial Compliance Officer
I'M TRYING TO	 Efficiently screen thousands of daily applications	 Check my eligibility before formally applying	 Batch-screen high-risk applicants
BUT	 Manual review is incredibly slow and prone to human error	 I want to avoid rejections that damage my credit score	 Multi-class payment codes are hard to quickly filter
BECAUSE	 Verifying extensive financial and demographic data at scale is inefficient	 Standard systems require a hard credit inquiry for a decision	 Clean, binary risk labels are needed for clear decisions
WHICH MAKES ME FEEL	 Stressed and overwhelmed	 Anxious and hesitant	 Frustrated by inefficient tracking

- **I AM** : A Bank Analyst
- **I'M TRYING TO** Efficiently screen thousands of daily applications
- **BUT** : Verifying extensive financial and demographic data at scale is inefficient
- **BECAUSE** : Clean, binary risk labels are needed for clear decisions

- A Prospective Credit Card Customer
- Compliance Officer
- Frustrated by inefficient tracking

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank credit analyst	Efficiently evaluate and screen daily incoming credit card applications	The manual review process is incredibly slow and tedious	Verifying extensive applicant financial profiles scale-wise is highly prone to human error	Stressed and overwhelmed by application backlogs
PS-2	A prospective customer	Check my eligibility for a new credit card online	I want to avoid formal rejections that damage my credit score	Traditional banking systems force a hard inquiry before providing a definitive answer	Anxious and hesitant to apply blindly.
PS-3	A financial compliance officer	Batch-screen high-risk applicants with historical past-due records	Complex multi-class payment histories are hard to quickly filter out	Raw transaction codes lack direct binary risk labels for immediate decision-making	Frustrated by the inefficiency of manual risk tracking.
